

La fontaine du Nombre d'Or

Parks and gardens

MONTPELLIER - Montpellier

Newly built, this fountain is amazing in its originality and imposing stature. Designed with an entirely underground mechanism, it springs straight up from the ground without any basin or construction of any kind. A truly aquatic attraction, it offers viewers an impressive series of jets which draw the most diverse patterns. The star turn is when the great water jet rises and falls twelve times to mark the striking of midday.
